

820 Emory Drive
Chapel Hill, N.C. 27514
28 November 1989

Dear Carolina:

This is just to let you know that Burrhus Skinner is terminally ill, if you don't already know it. He called to tell me, about 10 days ago, that he was suffering from Leukemia (a result of earlier irradiation for a skin condition) and that his life expectancy was short-- a matter of weeks or months. Please pass the word along to Maria Amelia, Margarida, and as many others as would like to know. I am sending a note to João Claudio .

Everything here in Chapel Hill is OK at the moment. Our ailments seem to be minor. A note from Peter Harzem tells us that he has been hospitalized, but is now at home in good condition. We hope that you and Mariozino are O.K. We never heard about the outcome of his accident. If the two of you will come to see us, I'll take your picture--just like the one we took in Tempe, which is now with several others on our wall !

Love to all,

Fred

This might be our Christmas letter--not a very happy one, but we're wishing you and the gang the very best.

F and J
